About This Game

Version 1.2 Out Now!

- **Strategy mode is now available on the plant selection screen**

This mode uses a set number of turns with no time limit. Plants will automatically collect resources between turns. Keep your plant balanced and try to maximize your resources on every turn to fruit each flower before winter comes!

- **Players can now grow the prickly pear cactus**

Cacti like the prickly pear have no leaves. Photosynthesis takes place in enlarged stems, requiring a slightly different approach to growing.

- **Bees!**

We've added bees to replace the current pollen system. Creating nectar will now spawn a bee. Players must click and drag the bee onto a female flower to pollinate.

Description

Behind all those leaves, roots, and petals is an intelligent bio-machine of starch, nutrients, and water. Take over a flower's seedling to help it grow and reproduce before winter approaches. Carefully gather and manage three key resources needed to create flowers and fruits. You'll never look at these organisms the same way again!

Key Features

- Learn about plant anatomy and function by controlling a plant's lifecycle for a year
- Make strategic choices from limited resources and evaluate how it affects your plant
- Maintain your plant's health against external influences such as winter weather
- Create up to four different types of plants, each with unique attributes and challenges
- Earn upgrades to enhance your garden, such as preying mantids to control pests

This game is a great throwback to sidescroll shootemups, and the gameplay gets right down to brass tacks. Soundtrack is fantastic, the weapons crafting system is extremely indepth and enjoyable, and the levels are very creative. Bundles of fun.. Crazy Saloon VR is an unpolished VR experience. It offers little in the way of entertainment, as the minigames are all extremely poorly executed (technically speaking) and there is a pointless mechanic of needing funds for minigames. Crazy Saloon VR is CRAZY BAD, avoid it.. OK. it is official.....

I am old.

I got this game in 1998 on a demo disk with my VooDoo2 GPU
The 2D part was done by the onboard graphics and the 3D part by de VooDoo2 card. ("SLI"* before it was cool)

I was so wowed by this game all those years ago.
Today saw it on sale and it runs great on Win10

*No not real SLI but just for you kids out there.. I present to you , the O305G Mercedes-Benz for omsi 2, An apsultly great bus to own for any omsi 2 lover. This bus has some amazing sounds and sounds very realistic when you compare it with the real life thing, this bus looks amazing and drives really well. in this DLC you get 4 variants of this bus and each variant is special in its own way . This bus fits in really well for most maps especially old maps.

Pros: Great sounds, Great texturs, Comes with some amazing repaints, Drives well, Very easy to drive, Fits in well with almost all maps.

Cons: Not licensed.

Conclusion: overall this is an amzing bus to own and defently an addon worth getting :). It was an "OK" short game. So far this is after one game - I'll update if anything is different after further games. This is to the ancient game HnefTafl what Battle Chess is to Chess. It gives a game played like HnefTafl with some variations on what you choose for special pieces, table, etc, but gives you little animated battles between the pieces. However it is from the same time period as the original Battle Chess so very pixelated and at times difficult to see clearly on a modern screen. But I enjoyed the game and appreciate having a Battle Chess version of this ancient game as well. I look forward to trying it more.

I would recommend this for those interested in games like Battle Chess that don't mind the aged graphics and it running in Dosbox.. As much as this is a valiant effort at a horror game, I cannot recommend it for a few reasons. Firstly (and foremost for me), the English translation is extremely bad, from contradictory text right at the start as well as the notes in the journal, and the notifications that pop up. Secondly, the head bob is way too much (feels like your walking around with a balloon for a head) and thirdly, there's no hints or suggestions to help you even get past the first part. I got bored after 10 minutes.

Probably one of the most snappy virtual reality games ever. Every VR player should try it out. The dynamics is good , hitting and getting hit is feels awesome. Nice game I love it.. It's a great update for people who frequently use clickteam.. Didn't list amounts in package description. (50x baits, 10x others)

The wording for Credits(?) and Baitcoins are exactly the same.
The credits are just standard currency, unless I missed something.

I don't really feel negatively towards this pack, but the execution was... horrific. (At least it's on theme?)

Edit: Oh. They edited the package description. Yay.. It's quite unfinished but a very engrossing experience all the same. Flying around, manoeuvring and landing on buildings is oddly entertaining. The flying around becomes quite intuitive after a bit of time. There's a few different locations, nothing massive and the textures are basic but functional.

Right now this is just a demo showing early potential, it's nothing more but flying around. However that alone is worth trying out..

I have been a fan of the civ franchise for a long time now. I was skeptical about this game at first and didn't buy it when it first released. The game looked like it was too cartoonish and not realistic enough for my liking. After playing a few games the art style has grown on me and I now prefer it to civ 5.

The main thing I like about this game is the city district system. Some people may hate it but i believe it adds a interesting dynamic to the game. It allows for different cities to focus on different things i.e. Science, Culture, Military. The way the religion system works is an improvement to civ 5 and makes religious victory's more interesting(except the AI hate it if you go near them with your religion.)

I haven't purchased any of the dlc yet so I can't comment on the improvements of that. However their is plenty of stuff you can download in the steam workshop if you ever get bored of the base game.

-If you are new to the civ games and franchise I would recommend playing this instead of previous games.

-If you looking for a more realistic game I would recommend civ 5 more.

-This game goes on sale quite often so I would personally waiting for it to go on sale before purchasing.. Beautiful !. Soundtrack is good enough, but there is only 10 out of 50 included. You can listen to the rest at the composers own site here:

[love the ending.. I'm blown away by the quality of this game. To be honest it probably will be my GOTY as unlike pretty much every game released within the last year and a half. THIS ACTUALLY WORKS.](#)

Pros:

[-Planting seeds so good.](#)

[-Picking apples so good.](#)

[-Voting UKIP to get the apples deported so good.](#)

[-Allowing you to become immersed in thinking you are Big Duke from Tracy Beaker with his gardening skills so good.](#)

[-Allowing you to roll a double lip in Aylmer Tower go good.](#)

Cons:

[-No multiplayer therefore the game will never have a pro scene which is really disappointing.](#)

[-Palfrey no longer uses Steam so he cannot experience this wonderful game.](#)
